Perioperative Nursing Care Program

19444

ElarabyHospital
elarabyhospital.com

Training Proposal

Introduction:

- In line with ELARABY Hospital's vision to become a leader in implementing patient safety measures in accordance with the latest 8th edition JCI standards, a Infection Prevention and Control Training Program will be launched, based on evidence-based practice (EBP).
- The training program will uniquely combine lectures with practical sessions to equip participants with the skills needed to deliver professional, evidence-based nursing care.

Scope of the program:

- To establish a center of excellence for nursing training focused on ensuring critical patient safety.
- To empower hospital nursing staff with the skills and knowledge required to deliver professional critical care based on evidence-based practice (EBP).

Benefits of the program:

- Establishing an efficient approach to patient safety and patient-centered care.
- Observe the best practices in the provision of healthcare services and become familiar with implementing the nursing procedures through well-planned practical training and live interaction with hospital staff.
- Participation in workshops and gain satisfactory knowledge regarding critical care nursing course.
